

Lesson 06 Exercise – Run TestCase in ScratchBook

Objective

By the end of this exercise, you will be able to run a Tosca TestCase in the ScratchBook.

Why is this important?

The ScratchBook is where you can run and test individual steps or portions of your tests and see the results before final execution. This allows you to debug the tests before you deploy them. The results of the test are available temporarily.

Key elements:

Run in
ScratchBook

Instructions

1. Logout of SAP and close the application. Then, run the TestCase "**01 Generate and Verify Sales Order**" in the ScratchBook. Tosca should launch your SAP application and log you in.
