Lesson 05 Exercise a – Add TestSteps

Objective

By the end of this exercise, you will be able to populate a Tosca TestCase with TestSteps by adding Modules to automate the SAP GUI application.

Why is this important?

Modules create the TestSteps for an automated TestCase and this is the first step in automation.helps with business readability of your TestCase.

Key elements:

TestStep   TestStepValue

Instructions

1. Add Standard Modules "**SAP LOGON**" and "**SAP LOGIN**" into the Folder "**SAP Login**". You can drag and drop them from the Modules section or use the shortcut **Ctrl+T** and search for the Modules one by one.
